Dear Parent/Guardian,

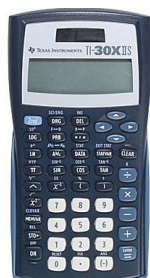

To help in preparation for Math 10-3 the Mathematics Department wanted to let everyone know the calculator requirements for the Apprenticeship and Workplace Route of Mathematics at Hilltop High School.

The Math 10-3 route was developed in conjunction with the trade and apprenticeship programs to ensure that the concepts are applicable for students planning on entering the trades, an apprenticeship, RAP, or going directly into the workforce. It leads to Math 20-3 in Grade 11 with a Math 30-3 option in Grade 12.

The recommended calculator is the TI-30XIIS or the SHARP EL 531XG. We recommend these calculators because they have the 2-line screen to show key strokes as well as completed calculations. However, any basic calculator with trigonometric functions will be sufficient.

We do not allow the use of phones as calculators during quizzes, tests or exams so it is important for each student to develop a proficiency on their chosen calculator in order to perform at their best.

Math 10-3 TI-30XIIS

Math 10-3 SHARP EL 531XG

If you have any questions or concerns regarding this information or regarding the Grade 10 math programs, please feel free to contact one of us via email.

Mathematically yours,

Katherine Fancy
