

POSITION TITLE: RAP Students

Alberta Newsprint Company (ANC), a joint venture of the Stern Group and West Fraser Timber Company Ltd., is a leading manufacturer of premium paper products. Located in Whitecourt, and operating with a non-unionized workforce, the firm's paper mill—the first in Alberta—produces paper of such high quality that it has become the standard by which other paper products manufactured in Canada are measured. The company is a successful, well-financed, progressive organization that is regarded as one the best companies in the paper industry.

ANC is looking for students interested in these exciting Registered Apprenticeship Program (RAP) opportunities. The RAP Program allows students to get a head-start on their careers by earning experience and hours while in high school. To be eligible, you must be a student local to Whitecourt (including Mayerthorpe and Fox Creek), in Grade 10 or 11, and looking to pursue a job in the trades after high school. At ANC, safety is of utmost importance, so having a strong safety mindset is required.

Students must also have their own reliable transportation to and from the ANC Mill site.

We have one opening in each of the below categories.

Heavy Equipment Technician (Heavy Duty Mechanic)

Term: Immediate Placement to May 2022

Maintain, repair and overhaul heavy vehicles and industrial equipment with the supervision of a certified technician, including:

- Forklifts
- Clamp Trucks
- Aerial Lift Equipment
- Yard Tractors
- Fire Trucks
- Various other pieces of stationary equipment.

Plus, may have exposure to:

- Interpreting work orders and technical manuals
- Diagnosing faults or malfunctions
- Adjusting equipment and repairing or replacing defective parts, etc.

Industrial Mechanic (Millwright)

Term: From May 2021 to May 2022

Install, maintain, repair and troubleshoot stationary industrial machinery and mechanical equipment with the supervision of a team of millwrights, including:

- Pumps
- Screw Conveyors
- Belt Conveyors
- Refiners
- Paper Machine Equipment
- Bearings
- Fans
- Engines

Plus, may have exposure to:

- Reading diagrams and schematic drawings and service manuals to determine procedures
- Fitting bearings, aligning gears and shafts, attaching motors and connecting couplings and belts to precise tolerances
- Repairing or replacing defective parts

DEADLINE TO APPLY IS MARCH 5, 2021.

Students: Contact your Off-Campus Coordinator for an application and more information.
